Real Estate Asset Manager wanted to work on our real estate software (Vienna)

Description

Join us in developing Austria's leading asset and portfolio management software.

We have over 20 years of experience in software development for the real estate industry, serving funds, banks, real estate and site developers and even mobile network operators. At our head office in Vienna, we serve clients in 10 countries and real estate portfolios worth over 31 billion euros across Europe.

Our asset and portfolio management software, metamagix.ICRS, combines professional depth with state-of-the-art technology and innovation. ICRS is web-based, open and modular, and features high-end interface technology. In short, ICRS offers our customers everything they need to work more efficiently and to make the most of their portfolios: reporting, process mapping, a collaboration platform for the entire company and a reliable database for strategic decisions.

Team spirit, trust, respect and customer service are all part of our DNA. We are a solid company with a strong product and many well-known clients – yet agile enough for flat hierarchies, unbureaucratic processes and individual opportunities for growth and learning.

If what you read resonates with you, and if you would like to support us in making our product even better, we would be happy to meet you.

We are looking for real estate asset managers who ...

- strive to make their colleagues' lives better by improving a leading software solution
- are experienced Excel wizards with an eye for attractive graphical evaluations
- have experience in communicating with property managers and owners, as well as with economic key figures and accounting data
- have an interest in software and databases and may even have already worked with ICRS …

Responsibilities

- Managing ICRS implementation projects including ongoing customer support
- Development and improvement of Excel reports and graphical web-based
